

### **HTL-312SUB**

HTL-312SUB is a single 18inch subwoofer speaker, designed to match with HTL-312 line array speaker. HTL-312SUB combines with HTL-310 to make a 3way line array sytem through accurate flyware, in large live show where requires sub-low frequency.

HTL-312SUB uses a 18inch woofer speaker with 5inch voice coil, built in a reflex cabinet with reflex holes at two sides. There is multi reinforcement plate inside the cabinet to reduce resonace, so to get powerful low frequency. The cabinet is made of birch plywood, with hard and environmental black painting. With good design flyware, it is convenient for installation.
